

## Three 6" Diagonal Squares

A collection of 6" knitted squares knit diagonally or corner-to-corner (C2C).

Collect them, donate them to blanket making charities, or make your own blankets.

So long as your garter stitch square (included) comes out the same size as mine, the rest should be the correct size too. If your garter square comes out larger, go down a needle size. If your garter square comes out smaller, go up a needle size. It is better for a square to be a fraction smaller than 6" as it is much easier to stretch a knitted square than it is to stuff it into a smaller space.

Have fun!
